

COVID procedures

Dear parents,

I would like to clarify procedures which you need to follow if you are concerned your child has Covid symptoms. We ask that you follow this simple flow chart below: We realise that the current testing regime is incredibly challenging, however it is essential that you get a test if your child or anyone in your household shows symptoms. The symptoms you are looking for are: *persistent cough, high temperature (above 37.8), and or loss of taste or smell.* **If your child has a test they MUST stay off school until the test result is known.** You MUST inform us of the result, **whether this is positive or negative.** Your child will not be admitted to school until we have this confirmation.

Thank you for your support in this matter.

Mrs Bradley-Wyatt
